

POLYKEN[®] Liquid Adhesive Systems #1027

Basic Use

Polyken liquid adhesive systems are recommended for use with only Polyken coating systems. The liquid adhesive systems consist of butyl based elastomers blended with polymeric resins dissolved in an organic solvent system. They can be used for machine or hand brush application, are non-toxic and non-polluting, and conform to local and national standards. In addition to the excellent adhesion to the pipe substrate and cathodic disbondment resistance, the pipe surface is protected against stress corrosion cracking with industry proven SCC inhibitors.

Polyken # 1027

Liquid adhesive system is ideal for hand brush application to rough, reconditioned, or grit-blasted pipe surfaces. It provides a uniformly smooth, instant tack surface for Polyken coating systems.

CAUTION:

- Store away from heat source. Read all label instructions prior to use.
- Properly stored, all Polyken liquid coating systems have a shelf life of 3 years. Please request an application specification and storage guideline from Berry Plastics.
- Polyken liquid adhesive systems are FLAMMABLE MIXTURES
